Claims 1 and 5

The inventions set forth in claims 1 and 5 do not involve an inventive step in the light of documents 1 and 2 cited in the international search report. Documents 1 and 2 both disclose the feature of crimping by means of a casting drum, drying and thereafter applying steam. The purpose of the inventions that are disclosed in documents 1 and 2, like that of the inventions set forth in the present application, is preventing curling; therefore, if conditions such as the temperature, the humidity and the period were to be adjusted with consideration of said purpose, it would be possible to establish parameters similar to those in the inventions that are set forth in the present application as a matter of course.

Claim 6

The invention set forth in claim 6 does not involve an inventive step in the light of documents 1, 2 and 4 cited in the international search report. Document 4 discloses the feature of using a steam chamber as the means for applying the steam.

Claims 4 and 8

The inventions set forth in claims 4 and 8 do not involve an inventive step in the light of documents 1 to 4 cited in the international search report. Document 3 discloses the feature of coating water upon the surface opposite the finished surface. Meanwhile, the inventions that are disclosed in documents 1 to 4 all share a common purpose, i.e. preventing curling; therefore, it would be easy for a person skilled in the art to conceive of combining the technical features in question for use.

Claim 2

The invention set forth in claim 2 is not disclosed in any of the documents that are cited in the international search report; therefore, the invention in question is novel and involves an inventive step. In particular, the feature of blowing moisture onto both the cast-coated surface and the reverse surface is not disclosed in any of the documents.

Claims 3 and 7

The inventions set forth in claims 3 and 7 are not disclosed in any of the documents that are cited in the international search report; therefore, the inventions in
